

KEEPING THINGS CONFIDENTIAL

As a financial institution, BAWAG PSK's greatest concern was for the safety and security of confidential content. The company wanted an easier way for employees to work on projects, access files, receive updates, and work remotely, while still guaranteeing the safety and protection of sensitive information. BAWAG PSK's ideal platform would have protected private cloud hosting, hosting from a secure data center in the European Union, encryption abilities, and restricted access controls, all while being easy-to-use and intuitive enough to benefit employees.

SAFE, INTUITIVE, AND EFFECTIVE

MangoApps strikes the perfect balance between uncompromised security and an enjoyable user experience, making it just right for BAWAG PSK. In fact, MangoApps was the only private cloud service that was able to satisfy all of BAWAG PSK's requirements, including end-to-end encryption with 256-bit AES, encryption during transmission, and encryption at rest. BAWAG PSK employees can now interact and engage fully with coworkers, easily accomplish tasks, receive company news, and increase their overall productivity without safety concerns of any kind.

COMPANY:

BAWAG PSK

HEADQUARTERS:

Vienna, Austria

EMPLOYEES:

BAWAG PSK maintains 4,000+ employees in 500 branches throughout Austria.

OVERVIEW:

BAWAG PSK is one of Austria's largest and best-recognized banks. The organization serves 1.6 million private customers and more than 60,000 business customers located all over Austria.

BAWAG PSK needed a modern and intuitive file sharing tool with state-of-the-art security features.

MangoApps gave BAWAG PSK a private, secure, and confidential space to safely share information.
