

FINDING THE RIGHT FIT

Kainos Software knew they needed to improve their communication tools but didn't know where to begin. They had attempted to incorporate an enterprise social network in the past, but it had ultimately been too limited for their needs. As a diverse and globally reaching software organization, Kainos Software was looking for a consolidated solution, not just another tool to use. From traditional intranet to file sharing to peer-to-peer collaboration, Kainos Software was in need of an easy to use, mobile friendly, and socially focused collaborative suite.

A COMPREHENSIVE SOLUTION

The highly adaptive yet simple to use nature of MangoApps made it the perfect platform, giving employees complete customization while still enjoying a straightforward and engaging environment. With detailed modules and comprehensive SSO abilities, MangoApps provided employees with searchable and centralized access to all of their resources. Most importantly, MangoApps offered users the mobile freedom and multi-lingual abilities they needed to seamlessly communicate between seven offices, five countries, and anywhere in-between.

COMPANY:

Kainos Software

HEADQUARTERS:

London, UK

EMPLOYEES:

Kainos has over 1,000 employees with offices in the UK, Ireland, Poland and the United States.

OVERVIEW:

Kainos Software is a private software company headquartered in Northern Ireland. Kainos works with businesses around the world, developing technology solutions for the public, healthcare, and financial services sectors.

Kainos Software needed a modern, comprehensive, and collaboration centered platform to help employees communicate together and share resources.

MangoApps exceeded expectations with an intuitive employee platform that is ready for everything from easy file access to detailed language translation.

SIMPLIFYING THE EXPERIENCE

Managing luxury items around the world requires significant coordination, but with different time zones, multiple languages, and various customs and cultures to manage, Christie's employees were struggling to keep everything organized. And Christie's existing CRM system only added to the issue. Employees struggled with the overly complicated system and many gave up on it entirely. Christie's knew it was time for a communication transformation. They needed a centralized employee platform to incorporate all of their existing systems and simplify company content sharing, helping employees work effectively around the world and on-the-go.

UNLIMITED COMMUNICATION

MangoApps' focus on in-field communication was the perfect fit for Christie's. An intuitive, mobile-friendly platform and detailed multi-lingual features made it easy to communicate across continents and quickly access information. And as MangoApps turned work tools into actual assets, employee engagement began to grow too. Best of all, MangoApps' comprehensive SSO capabilities allowed Christie's to integrate all of their existing systems, keeping information safe and creating one easy to manage area. With MangoApps, every employee at Christie's has the freedom to work however, with whatever, and wherever they need.

COMPANY:

Christie's

HEADQUARTERS:

London, UK

EMPLOYEES:

Christie's has over 2,200 employees throughout 85 different offices and operates in 43 countries around the world.

OVERVIEW:

Founded in 1766, Christie's is still well-known today as the world's top auctioneer of antiques, artworks, and other prized items. Christie's helps collectors and art enthusiasts all over the world find priceless and one of a kind creations.

Christie's needed a way to for its worldwide workforce to communicate effectively, share information and stay in sync with each other.

MangoApps offered a truly integrated solution, successfully incorporating Christie's exiting tools while also adding helpful new features.

SAFETY AND SECURITY

As a financial services provider, security at QIWI is essential. Employees needed a way to keep important, confidential, and sensitive information safe without making it impossible to access. Customer content had to be secure without stopping employees from working effectively. As leaders within the financial industry, QIWI also needed a centralized space for employees to collaborate and brainstorm together about industry advancements and solutions to customer needs. Finally, QIWI required all of its resources to be centrally located and easily accessible to workers both at a desk and in the field.

THE COMPLETE PACKAGE

MangoApps offered QIWI everything it needed and a little more. Its comprehensive mobile app made switching between a desktop and a smart device easy, without losing any functionality. And a new collaborative and engaging enterprise social network turned sharing ideas, storing files, and working together a breeze. QIWI even started utilizing even more features like intranet pages and project management tools. But most importantly, MangoApps' high-level security features, private groups, and custom permission settings ensured QIWI's internal information stayed safe under every circumstance.

COMPANY:

QIWI

HEADQUARTERS:

Nicosia, Cyprus

EMPLOYEES:

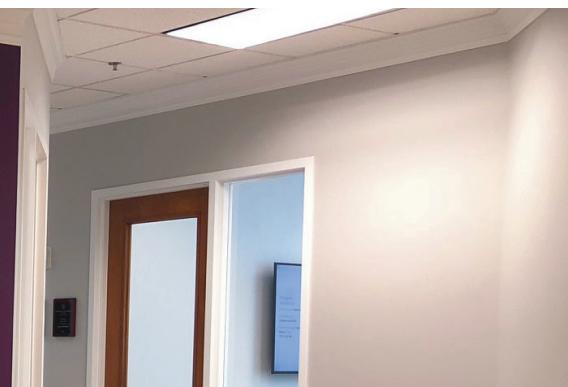

QIWI has more than 1100 employees located all around the globe.

OVERVIEW:

QIWI is the leading provider of next-generation payment services in Russia and the Commonwealth of Independent States. QIWI has millions of virtual wallets, kiosks, and terminals available for its more than 70 million customers.

QIWI needed a secure, collaboration centered, file sharing system to help employees safely access information and brainstorm innovative solutions.

MangoApps provided straightforward file sharing capabilities and an engaging enterprise social network encompassed in advanced security settings.

CREATING CLEAR COMMUNICATION

Berkshire Hathaway's wide-reaching subsidiaries should have been a benefit to every business, but individual companies lacked an effective way to communicate together and take advantage of opportunities. Coordinating communication between companies was difficult, so businesses usually acted independently. But as a result, processes like purchasing and supplier negotiations were being repeated over and over again by every individual business. Berkshire Hathaway knew it needed a better way to consolidate resources and help its subsidiaries work together.

WONDERFULLY WORKING TOGETHER

MangoApps gave Berkshire Hathaway a private, secure, organization-wide network, where its subsidiaries could easily communicate together. Business leaders across the organization were able to exchange ideas and share documents in an entirely new way, helping each company to improve and expand. Companies could even collaborate on goals and projects throughout the organization. And perhaps most importantly, subsidiaries were finally able to combine similar tasks together, providing everyone with increased cost benefits and additional simplicity.

COMPANY:

Berkshire Hathaway

HEADQUARTERS:

Omaha, NE

EMPLOYEES:

Berkshire Hathaway has over 300,000 employees in more than 50 subsidiaries around the world.

OVERVIEW:

Berkshire Hathaway is one of the world's largest holding companies, with stocks in world-renowned organizations such as Fruit of the Loom, GEICO, Dairy Queen, Delta Air Lines, American Express, and many more.

Berkshire Hathaway struggled to help its many subsidiaries communicate together and benefit from the collective resources of each organization.

MangoApps gave Berkshire Hathaway a fully integrated environment, where businesses could easily communicate, collaborate, and work together.

ENGAGING EMPLOYEES

Panasonic North America wanted to help employees stay informed and excited about products in an engaging and interactive environment. They needed a space where everyone could have fun, ask questions, share content, and easily access information, as well as include the occasional external user. And of course, the platform had to include Panasonic North America branding and culture. It needed to be helpful, easy to use, and present users with a simple landing page, in addition to incorporating all of Panasonic North America's colors, logo, and look and feel.

AN INTUITIVE EXPERIENCE

MangoApps provided Panasonic North America with the simple, inviting, and intuitive space it was looking for. Employees eagerly embraced the enterprise social network where it was easy to post updates, learn about products, share resources, or chat in real time. MangoApps even made it easy to organize information at a company, department, team, and project level, or include any external guest users. Best of all, with completely customizable branding abilities, employees experienced a platform that perfectly represented Panasonic North America.

COMPANY:

Panasonic North America

HEADQUARTERS:

Newark, NJ

EMPLOYEES:

Panasonic North America has over 270,000 employees worldwide.

OVERVIEW:

Panasonic North America is known across the continent as a dedicated supplier of TVs, digital cameras, home appliances, laptop computers, and other high-quality everyday electronics.

Panasonic North America needed an easy to use, centralized, social environment for employees to collaborate together and stay informed.

MangoApps provided Panasonic North America with an engaging enterprise social network, helping employees work together with ease.

LOSING INFORMATION

With more than 500 hundred clinicians spread throughout 9 different states, EPMG needed a straightforward and efficient way to keep everyone informed. EPMG had tried to use email in the past, but content was often lost or difficult to understand. The organization was unable to easily announce upcoming events, share clinician findings, and provide resources to employees. And new hires, who are always occurring in a staffing organization, had a hard time sending and receiving important information. EPMG was ready for a mobile-friendly, visually engaging, and centralized company communication platform.

MAKING IT EASY

MangoApps helped EPMG seamlessly transition from frustrating emails to an integrated, easy to use, and supportive company intranet. EPMG was able to easily share all of its resources with employees and simplify the new hire on-boarding experience. With straightforward organization and comprehensive search features, employees no longer needed to dig through message archives or decipher complicated mass messages. In MangoApps, EPMG communication exists on a social media inspired news feed. Updates happen instantly and employees use comments, reactions, file sharing and more to interact together.

COMPANY:

Emergency Physicians Medical Group

HEADQUARTERS:

Ann Arbor, MI

EMPLOYEES:

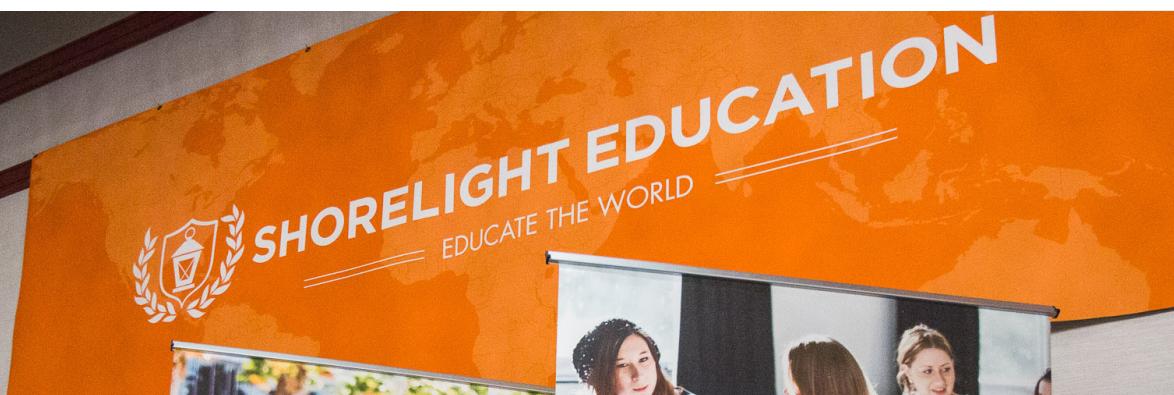

Emergency Physicians Medical Group (EPMG) works with over 500 clinicians spread across more than 9 states.

OVERVIEW:

EPMG is a physician lead and owned management company, responsible for clinician staffing across several states and improving patient safety. EPMG also regularly holds health-related training programs and leadership forums.

With hundreds of clinicians spread across many different locations, EPMG needed an easy and effective way to keep everyone connected.

MangoApps gave EPMG the tools it needed to remove confusing communication methods and successfully connect all of their employees.

SIMPLIFIED SHARING

With an almost entirely remote workforce spread throughout the world, it was nearly impossible for Shorelight Education employees to meet face to face. The organization needed a way to keep everyone in touch with both company-wide and peer-to-peer communication. Their current email system was messy and didn't give workers reliable access to files, documents, images, and other important information. Shorelight Education also wanted to strengthen its existing company culture, creating an environment where employees could celebrate success, get to know each other, and create a real community.

A CENTRALIZED SOURCE

With MangoApps, Shorelight Education was able to create a visual, engaging, and collaborative environment for all of its employees. Sending company announcements and team newsletters or updating information became super simple, and employees finally had a dependable platform to access content and communicate together. MangoApps' mobile friendly features even made remote work a breeze. But best of all, coworkers were finally able to authentically connect with each other, helping Shorelight Education accomplish its vision of a fun, inclusive, and supportive environment where people loved to be.

COMPANY:

Shorelight Education

HEADQUARTERS:

Boston, MA

EMPLOYEES:

Shorelight Education has 200+ remote employees located around the world.

OVERVIEW:

Shorelight Education works with international students seeking undergraduate or graduate opportunities in the United States. The organization seeks to improve student opportunities and prepare students for overall success.

Shorelight Education needed a way for its almost entirely remote work base to conveniently communicate and share information.

MangoApps helped Shorelight Education not only improve communication but also unite its remote staff into a tight-knit community.

WIDESPREAD WORK

As a publication organization, ACSP receives, creates, and works with documents every day. But with employees spread across universities, laboratories, and third-party businesses throughout the world, it can be difficult to share files effectively. ACSP needed a better way to help employees access information, collaborate on documents, and store completed files. ACSP was additionally looking for a new way to share company announcements, streamline communication, and move away from ineffective internal emails.

FINDING EVERY FILE

MangoApps' interactive company intranet and intuitive team areas completely replaced ACSP's internal email, simplifying communication and ensuring employees could interact at every level. MangoApps also greatly improved ACSP's file sharing abilities, allowing users to work on documents effectively without tracking new versions, emailing updates, or worrying about safety and security. And best of all, MangoApps' comprehensive storage and search abilities made cataloging finished work and finding files incredibly easy. With MangoApps, ACSP enjoys easy file access and collaboration abilities, all within a centralized workspace.

COMPANY:

American Chemical Society Publications

HEADQUARTERS:

Washington, DC

EMPLOYEES:

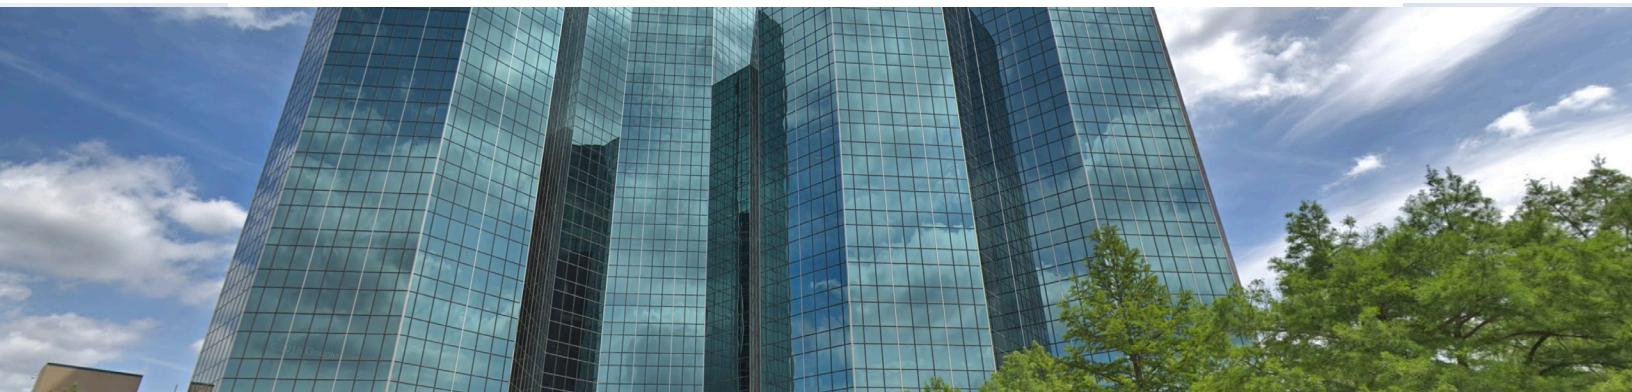

American Chemical Society Publications (ACSP) has employees in 200 different editorial offices around the world.

OVERVIEW:

ACSP is a nonprofit organization dedicated to improving lives through chemistry. Known for high editorial standards and quick publication times, ACSP publishes more than 40,000 research papers in 47 different journals every year.

With more than 200 editorial offices located all over the world, ACSP needed an easier way to share documents and simplify file sharing.

MangoApps gave ACSP the perfect platform to streamline communication, replace email, and access files in an easy-to-use and centralized space.

CONFUSING COMMUNICATION

As a globally diverse organization, AGC was having a hard time tying all of its employees together. A wide variety of languages, cultures, time zones, and even client types made it difficult to share company information in a fast and productive way. Employees and shareholders alike were often unaware of important news or unable to offer input. And managing projects through remote departments was often just as difficult, as team members struggled to share updates and collaborate together. AGC knew it was time to communicate more effectively.

TYING EVERYONE TOGETHER

MangoApps' designated group and project spaces made it easy for employees to post updates, share files, and instantly communicate together. And descriptive project tracking tools allowed managers to keep an eye on updates and monitor goals accurately. "It makes project collaboration much simpler," shared Amitkumar Chouhan, a senior engineer at AGC. "Everyone knows what the goals are [and] it brings a fun factor to the working environment." MangoApps' comprehensive intranet and detailed department pages simplified wide-reaching communication as well, helping everyone enjoy a centralized workspace that incorporated all of their needs.

COMPANY:

AGC Networks Limited

HEADQUARTERS:

Irving, TX

EMPLOYEES:

AGC Networks Limited (AGC) has more than 600 employees spread out across 6 continents.

OVERVIEW:

AGC helps businesses stay safe and focused on success by managing their IT services, cybersecurity, data centers, and more. AGC works with clients around the world and from every kind of industry.

With employees on almost every continent, AGC needed a way to bridge communication, share updates, and manage existing projects.

MangoApps successfully created a space where tracking tasks, sharing news, and collaborating together became effortless and easy.

CREATING CUSTOMIZATION

Duke CE offers each of its clients a customized learning curriculum designed to address their specific business challenges. As a part of the year long learning process, each program includes online discussions, collaborative idea sharing, and various assignments. Duke CE needed an easy to use, secure, and private environment where participating executives could interact with instructors, collaborate with peers, and upload documents or other classwork. Because curriculums are based around individual clients, the platform also had to be highly customizable and able to include corporate elements like the client's company logo, colors, and general feel.

AN ONLINE ENVIRONMENT

With MangoApps, instructors are able to tailor each executive's learning environment to match their unique needs. Clients have a secure online location to work on assignments, connect with instructors or peers, post ideas, and share files all in real time. And each online learning platform is individually branded with their company's logo, colors, and overall style, creating a truly personalized experience. MangoApps has helped Duke CE enhance in-person learning with a perfectly integrated online classroom, enabling executives to access resources on the go, collaborate in real time, and fit assignments seamlessly into a busy schedule.

COMPANY:

Duke Corporate Education

HEADQUARTERS:

Durham, NC

EMPLOYEES:

Duke Corporate Education (Duke CE) is staffed by 115+ educators and business practitioners as well as multiple outside consultants.

OVERVIEW:

Duke CE is a non-profit corporate education program created by Duke University. The program designs custom content for corporate clients, helping them address their unique real-world and real-time business challenges.

Duke CE was looking to build a customized online learning environment targeted around the needs of each corporate client.

MangoApps gave Duke CE a highly customizable platform for clients to communicate, share work, and learn successfully.

SOMETHING MORE MODERN

While Marchex technically had an internal intranet, the system was old, outdated, and difficult to use. Employees instead relied on email to make announcements, share files, and take care of day-to-day tasks. But email wasn't very effective either. Coworkers struggled to work together and often felt out of the loop. And employers needed an effective way to safely share confidential or sensitive information. Marchex was ready for a modern and easy to use communication platform enabling employees to stay connected, access resources, and improve productivity.

AN EASY-TO-USE INTRANET

MangoApps made it simple for Marchex to add and edit intranet pages, keeping content reliable and up-to-date. And its powerful search abilities ensured information was always accessible, no matter when it was originally posted. MangoApps' intuitive and easy to use environment even increased company collaboration, creating a space for employees to work together, share files, and replace internal email. Best of all, MangoApps included a wide variety of advanced security features, guaranteeing Marchex content stayed safe and secure under every circumstance.

COMPANY:

Marchex

HEADQUARTERS:

Seattle, WA

EMPLOYEES:

Marchex has over 500 employees with offices in Seattle, New York City, and Las Vegas.

OVERVIEW:

Marchex provides companies with mobile advertising performance analysis including deep insight into consumer reach, campaign success, hard data, and ad generated ROI reports.

Marchex needed an updated and user-friendly intranet to share content and replace inefficient email communication.

MangoApps helped Marchex modernize its old communication, creating an engaging, easy to use, and searchable system.

AN EXPANDING ORGANIZATION

As a young organization in an always changing industry, Nerium needed a flexible and adaptive internal communication system that could keep up with industry changes and meet their fast-paced growth requirements. As a part of that effort, Nerium also needed a tool that was modern, easy to use, and engaging to employees, creating a clear communication hub and centralized workspace. To Nerium, the perfect internal tool would provide easy access to resources, encourage peer-to-peer collaboration, and simplify wide-reaching company communication.

PREPARED FOR THE FUTURE

For Nerium, the customization available in MangoApps was absolutely essential. Being able to activate or deactivate features at any time ensured Nerium could create the perfect platform for its current needs and easily adjust features at any point. And MangoApps' simple file sharing abilities and modern intranet pages guaranteed information was always accessible. Nerium employees even improved their overall engagement and team collaboration, as the wide range of social tools available in MangoApps made sending news and building relationships even easier.

COMPANY:

Nerium

HEADQUARTERS:

Addison, TX

EMPLOYEES:

Nerium has 300+ employees and continues to expand every day.

OVERVIEW:

Nerium is a private skin care company offering age-defying products developed from the Nerium oleander plant. Founded in 2011, Nerium has taken off right away and continues to adapt and grow in an ever-changing market.

Nerium needed a modern internal communication system able to keep up with its fast growth and regularly changing requirements.

MangoApps created a personalized and centralized space for employees to communicate, collaborate, and access everything they need.

KEEPING THINGS CONFIDENTIAL

As a financial institution, BAWG PSK's greatest concern was for the safety and security of confidential content. The company wanted an easier way for employees to work on projects, access files, receive updates, and work remotely, while still guaranteeing the safety and protection of sensitive information. BAWG PSK's ideal platform would have protected private cloud hosting, hosting from a secure data center in the European Union, encryption abilities, and restricted access controls, all while being easy-to-use and intuitive enough to benefit employees.

SAFE, INTUITIVE, AND EFFECTIVE

MangoApps strikes the perfect balance between uncompromised security and an enjoyable user experience, making it just right for BAWG PSK. In fact, MangoApps was the only private cloud service that was able to satisfy all of BAWG PSK's requirements, including end-to-end encryption with 256-bit AES, encryption during transmission, and encryption at rest. BAWG PSK employees can now interact and engage fully with coworkers, easily accomplish tasks, receive company news, and increase their overall productivity without safety concerns of any kind.

COMPANY:

BAWAG PSK

HEADQUARTERS:

Vienna, Austria

EMPLOYEES:

BAWAG PSK maintains 4,000+ employees in 500 branches throughout Austria.

OVERVIEW:

BAWAG PSK is one of Austria's largest and best-recognized banks. The organization serves 1.6 million private customers and more than 60,000 business customers located all over Austria.

BAWAG PSK needed a modern and intuitive file sharing tool with state-of-the-art security features.

MangoApps gave BAWG PSK a private, secure, and confidential space to safely share information.

SASSER
FAMILY HOLDINGS, INC.

CREATING A CULTURE

Sasser Family Holdings wanted to build a united company where employees could communicate, connect, and get to know each other, regardless of job title or geographic location. The organization knew that while job requirements and work locations meant many employees were physically separated, they could still build a strong company culture where everyone felt welcomed and belonged. Sasser also wanted to give coworkers an opportunity to ask questions, offer advice, and share experiences, enabling employees to learn from each other.

A CONNECTED COMPANY

The MangoApps team applied custom Sasser branding throughout the entire user interface, creating an inclusive and familiar environment for all employees. Descriptive employee profile pages and innovative collaboration tools made it easy to learn about coworkers and connect with friends from around the world. And best of all, MangoApps' engaging and inclusive environment encouraged long-lasting employee participation. For the first time in Sasser history employees were successfully sharing stories and ideas together with centralized company communication.

COMPANY:

Sasser Family Holdings

HEADQUARTERS:

Chicago, IL

EMPLOYEES:

Sasser Family Holdings has 600+ employees spread throughout North America, Australia, and Europe.

OVERVIEW:

Sasser Family Holdings is a family-owned transportation service and management company. Sasser is a leader in the industry, providing exceptional rail and vehicle transportation services.

Sasser Family Holdings needed a collaborative and culture building communication system to unite employees around the world.

MangoApps gave Sasser Family Holdings a place for employees to build meaningful relationships and interact together.

ADAPTING TO GROWTH

A fast-growing company is an exciting sign of success, but it can also cause unexpected communication changes. For MTSI, rapid growth created challenges for both their company culture and essential communication. With employees spread out across the country, impromptu meetings and unplanned brainstorming sessions seemed impossible. MTSI needed a way to reconnect employees and find the same closeness they had originally come to enjoy, while still maintaining the absolute secrecy and security clearance multiple government contracts required.

BEST OF BOTH WORLDS

MangoApps helped MTSI recapture its small company experience. With dedicated group and project spaces, detailed employee profile pages, and an engaging company intranet, it was easy for employees across the country to collaborate together, share ideas, make new friends, and stay up-to-date on company news. But most importantly, workers could benefit from cloud technology without security concerns. As an approved AWS GovCloud partner, MangoApps satisfied all of MTSI's high-security standards and ensured data stayed in the United States at all times.

COMPANY:

Modern Technology Solutions Inc.

HEADQUARTERS:

Alexandria, VA

EMPLOYEES:

Modern Technology Solutions Inc. (MTSI) has more than 600 employees in eight offices across the United States.

OVERVIEW:

MTSI is an employee-owned and operated technology firm, providing specialized technical, engineering, and acquisition services to a wide range of government and commercial customers.

As a fast-growing organization with multiple government contracts, MTSI needed a safe, secure, and instantaneous way to keep in touch.

MangoApps gave MTSI a reliable communication and collaboration system that exceeded all of their storage, speed, and safety needs.

**IID**

CREATING A SAFE SPACE

IID had an interesting idea, create a safer online experience with cross-company communication. “We’re trying to enable a neighborhood watch for the Internet,” shared IID CEO Lars Harvey. “We want to let companies and organizations share information in a secure place.... Once one company learns about a [hacking] technique... they need to be able to share that with others.” But collaboration can’t happen without the right environment. IID needed a communication platform where companies could easily ask questions, contribute to conversations, and access security resources.

SECURITY IN ACTION

MangoApps’ intuitive nature and social media inspired design made it the perfect tool for IID’s cybersecurity project. With visually engaging news feeds, focused group spaces, real-time chats, comprehensive Wikis, and deep search abilities, MangoApps offered the tools to orchestrate success, while still being straightforward and simple to use. And MangoApps’ high-level safety and security features were, of course, an obvious advantage. Participating companies could see effective cybersecurity in action and share information or test out ideas in a completely safe setting.

COMPANY:

Internet Identity

HEADQUARTERS:

Tacoma, WA

EMPLOYEES:

Internet Identity (IID) has 700+ employees managing security concerns of every kind.

OVERVIEW:

IID is a cybersecurity intelligence agency protecting governments, financial service firms, e-commerce businesses, and internet service providers from security risks. IID helps every organization work with confidence.

IID needed a space for organizations to share cybersecurity advice, create solutions, and ultimately build a safer online experience.

MangoApps helped IID facilitate an environment where companies could easily interact together and collaborate on new ideas.

INFORMED ON-THE-GO

As a not-for-profit credit union, SLCCU is proud to provide members with better rates, fewer fees, and an exceptional overall experience. SLCCU was ready to become even better by strengthening its internal communication. SLCCU tellers and other floor staff often worked on-the-go or without regular access to a computer. Staying up-to-date on news was difficult and employees struggled to communicate with the corporate office and other branches. SLCCU need a mobile, social, and easy to use tool to help employees communicate quickly across the company and build a supportive company community.

A SOCIAL SETTING

MangoApps perfectly combined the security features of a financial institution with the social tools employees loved. As a social media inspired platform, MangoApps created a visually engaging and familiar experience, especially for younger employees, making it the perfect place for company culture to grow. And MangoApps' easily accessible company intranet turned searching for and sharing news into a simple and straightforward experience. Employees were no longer uninformed or out of the loop, and could receive and react to updates instantly, even without a company email address.

COMPANY:

St. Louis Community Credit Union

HEADQUARTERS:

St. Louis, MO

EMPLOYEES:

St. Louis Community Credit Union (SLCCU) has 150+ employees spread across the greater St. Louis region.

OVERVIEW:

SLCCU is Missouri's 6th largest credit union, providing affordable and personalized banking services to more than 60,000 members. SLCCU serves members in 11 branches throughout the greater St. Louis area.

SLCCU needed a mobile, user-friendly, and socially engaging collaboration tool to help its on-the-go employees work effectively.

MangoApps provided SLCCU with a social media inspired collaboration platform utilizing the tools employees already loved.

MUNICIPALITY OF THE DISTRICT OF CHESTER

A BETTER EXPERIENCE

MDC wanted a way to improve their citizen's experience and simplify the local government process. They were interested in a social intranet but needed a tool that worked well in a government environment. The platform had to be intuitive, organized, collaborative, and most importantly, completely confidential. MDC was also interested in creating cross-collaborative abilities with other government agencies across Nova Scotia, allowing them to share resources, communicate together, and remove many of the frustrating roadblocks employees regularly faced.

CROSS COLLABORATION

MangoApps' advanced privacy abilities and easy to use interface made it a great fit for MDC. The MangoApps organization feature was also an important advantage. By allowing multiple organizations within a single network, each Nova Scotia municipality had its own collaborative environment and could effortlessly communicate across municipalities. With improved file sharing, increased organization, simplified communication, and cross-collaborative abilities, MDC improved not only their own internal experience but also the local government process for individuals throughout Nova Scotia.

COMPANY:

Municipality of the District of Chester

HEADQUARTERS:

Nova Scotia, Canada

EMPLOYEES:

The Municipality of the District of Chester (MDC) has more than 100 employees working throughout the district.

OVERVIEW:

MDC is the local government agency for The Municipality of the District of Chester, a municipal district located in Nova Scotia, Canada. MDC seeks to justly represent and serve all of its local residents.

MDC needed a way to simplify its internal communication, speed up government work and serve district members more effectively.

MangoApps helped MDC not only improve its own communication but also connect with other local government branches in Nova Scotia.

EFFECTIVE ORGANIZATION

As an investing institution, JAT Capital Management relies a lot on reports. Financial analysts regularly write, read, and work with in-depth research reports detailing the health and availability of target companies. These same reports are also often shared with coworkers, managers, and other employees. JAT Capital Management needed a straightforward way to compile, organize, and share financial reports and find existing records easily. Employees also needed to be able to access content at any time and from any kind of device.

SHARING SIMPLIFIED

MangoApps' detailed project tools and comprehensive file-sharing abilities made it easy for analysts to work effectively every day. With designated project spaces, comprehensive wikis, and plenty of storage space, information was simple to share and always organized. MangoApps' deep search abilities even helped employees access information fast with predictive searches, advanced search features, and save search parameters for future use. And best of all, MangoApps' easy to use mobile abilities helped everyone access information from any device.

COMPANY:

JAT Capital Management

HEADQUARTERS:

New York City, NY

EMPLOYEES:

JAT Capital Management has more than 50 employees with offices in New York and Connecticut.

OVERVIEW:

JAT Capital Management is a global equity investment firm. They provide clients with both long-short and long equity strategies with a focus on travel, leisure, and gaming investing.

JAT Capital Management needed a better way to organize investment analysis and easily share research results across the company.

MangoApps gave JAT Capital Management a searchable, project-based space for sharing, storing, and working with data.

KEEPING CONTENT SAFE

Tangible Security wanted to empower its employees with the advantages of social collaboration software. They knew encouraging communication and a collaborative environment would not only create a fun and engaging workplace but also boost productivity and overall company success. But Tangible Security had one serious concern. As a cybersecurity organization with both government and corporate contracts, data protection was incredibly important. Tangible Security needed a system where sensitive information would be easily accessible and secure.

AN ON-PREMISE ANSWER

MangoApps provided Tangible Security with a completely on-premise social solution, ensuring information was always in a secure environment. Employers were even able to create private projects and enable customized file permissions for particularly confidential content. And of course, in addition to added safety, MangoApps gave Tangible Security employees an all-encompassing and collaborative experience. It was finally easy for coworkers to share company resources, communicate openly, build office relationships, and work together effectively.

COMPANY:

Tangible Security

HEADQUARTERS:

Columbia, MD

EMPLOYEES:

Tangible Security has 50+ employees with offices along the East Coast.

OVERVIEW:

Tangible Security develops and deploys cybersecurity solutions for both corporate clients and government organizations. They specialize in protecting sensitive data, infrastructure, and competitive advantage.

Tangible Security needed a way to implement safe, secure, and reliable social collaboration software.

MangoApps provided an innovative and dependable social experience in a completely on-premise environment.

North York Community House

OVERCOMING EMAIL

North York Community House employees managed programs, organized events, and researched opportunities in more than 80 local communities. From after-school programs to local career fairs, employees were always on the go. The organization needed a better way to keep everyone informed, provide easy access to information, and help co-workers collaborate about community needs. While email worked to an extent, it was difficult to access in the field and didn't encourage natural collaboration. North York Community House wanted a simplified, centralized, and fieldwork friendly communication solution.

WORKING FROM ANYWHERE

MangoApps gave North York Community House the freedom it needed to work easily on the go. With groups, chats, tracking tools, and file sharing abilities all easily available from a smart device, work became a truly seamless experience. Sharing wide-spread company news suddenly felt simple and staff were able to interact with coworkers across the organization. "It's great to have all of our information and correspondences in one area where we can access it anywhere." shared Rashmi Sheth, North York Community House Operations Manager. "Our staff are communicating with each other on a whole new level."

COMPANY:

North York Community House

HEADQUARTERS:

Toronto, Canada

EMPLOYEES:

North York Community House's 100 employees serve communities all throughout the greater Toronto area.

OVERVIEW:

North York Community House is a charitable neighborhood organization focused on improving communities, helping families, and supporting new Canadians. The organization helps over 25,000 individuals every year.

North York Community House needed a way to connect employees, share information, and replace inadequate emails.

MangoApps gave North York Community House the ideal environment to collaborate together and access company content.

A COMPANY COMMUNITY

As a local non-profit organization, United Way of Greater St. Louis perfectly understood the power of a unified community. Communities that successfully come together are happier, more productive, and better able to take on difficult tasks. After helping dozens of different counties find lasting success, United Way of Greater St. Louis knew it needed to do more to strengthen and engage its own company community. Employees needed an easier way to build friendships, work together, share ideas and resources, and ultimately stay connected at every level.

ENGAGING EMPLOYEES

MangoApps helped United Way of Greater St. Louis connect like never before. Centralized communication through an interactive social intranet made staying informed easy and gave everyone the chance to contribute to conversations. And a detailed company directory helped employees get to know coworkers company-wide. With employee photos and comprehensive personal profiles, employees were able to easily match names to faces and learn interesting information, helping them build real relationships and strengthen company culture.

COMPANY:

United Way of Greater St. Louis

HEADQUARTERS:

Saint Louis, MO

EMPLOYEES:

United Way of Greater St. Louis has over 50 employees serving residents in both Missouri and Illinois.

OVERVIEW:

United Way of Greater St. Louis assists 16 counties throughout Missouri and Illinois. The organization helps communities achieve success by partnering with more than 170 local non-profit organizations.

United Way of Greater St. Louis needed a way to connect employees together across more than a dozen different counties.

MangoApps provided United Way of Greater St. Louis with searchable, accessible, and engaging company communication.
