MangoApps™

SAFETY AND SECURITY

As a financial services provider, security at QIWI is essential. Employees needed a way to keep important, confidential, and sensitive information safe without making it impossible to access. Customer content had to be secure without stopping employees from working effectively. As leaders within the financial industry, QIWI also needed a centralized space for employees to collaborate and brainstorm together about industry advancements and solutions to customer needs. Finally, QIWI required all of its resources to be centrally located and easily accessible to workers both at a desk and in the field.

THE COMPLETE PACKAGE

MangoApps offered QIWI everything it needed and a little more. Its comprehensive mobile app made switching between a desktop and a smart device easy, without losing any functionality. And a new collaborative and engaging enterprise social network turned sharing ideas, storing files, and working together a breeze. QIWI even started utilizing even more features like intranet pages and project management tools. But most importantly, MangoApps' high-level security features, private groups, and custom permission settings ensured QUWI's internal information stayed safe under every circumstance.

COMPANY:
QIWI

HEADQUARTERS:
Nicosia, Cyprus

EMPLOYEES:
QIWI has more than 1100 employees located all around the globe.

OVERVIEW:
QIWI is the leading provider of next-generation payment services in Russia and the Commonwealth of Independent States. QIWI has millions of virtual wallets, kiosks, and terminals available for its more than 70 million customers.

QIWI needed a secure, collaboration centered, file sharing system to help employees safely access information and brainstorm innovative solutions.

MangoApps provided straightforward file sharing capabilities and an engaging enterprise social network encompassed in advanced security settings.
